Raised garden bed, 1200 mm - VZH120

PROPERTIES:

Material: steel

Colour: according to the RAL chart

Length: 1200 mm

Height: 670 mm

Width: 500 mm

Wall thickness: 3 mm

Weight: 64 kg

Volume: 400 l

Surface treatment: powder paint

Suitable use: outdoor areas

PRODUCT DESCRIPTION:

A raised bed is a practical and design-oriented garden feature intended for growing vegetables, herbs, and ornamental plants. Due to its construction above ground level, it allows better control over soil quality, ensures good drainage, and limits weed growth. The bed also makes gardening easier because it reduces the need to bend while planting and maintaining. The surface finish is treated with powder coating according to the RAL color chart.

USE:

The use of a raised bed is suitable for gardens, as well as terraces or courtyards. It allows for efficient cultivation in a smaller space and extends the growing season due to faster soil warming in the spring. It is an ideal choice for both beginners and experienced growers who want to have better control over their plants.
